

ANOTHER MIRACLE

With every breath
With every heartbeat, every prayer
With every step you take
I'll walk along to help you find your way
In the quiet of the darkest night
I'll be the voice
That keeps reminding you
You're stronger than you know

**For you are loved
I hope that you can feel it
Your very spirit illuminates this world, oh yeah
And as the morning sun returns
We're thankful to be here
For another day, another miracle**

The road is hard
Against the odds we persevere
The sky is filled with rain again
And we can't make it disappear
But we're sheltered in
And safe for now
We're dry and warm
With only love and faith
We're riding out the storm

**And you are loved
I know that you can feel it
Your very spirit illuminates this world
And as the morning sun returns
We're thankful to be here
For another day, another miracle**

This time is ours to spend together
Time alone is all we have
To make our case
To win the race

**And you are loved
I hope that you can feel it
Your very spirit illuminates this world
And as the morning sun returns
We're thankful to be here
For another day, another miracle
For another day, another miracle**
